

## AV ANNOUNCER

Digital technology has revolutionised the way mass media is distributed. **AV ANNOUNCER** is specially designed to bring media to large groups of people in rural and urban environments.

It is completely self-contained and independent of external power supplies. Using the video projector, programmes on DVD may be shown to night-time audiences using the 180cm x 240cm rear projection screen and the PA system.

All the playback equipment is housed and operated from portable flight cases to enable the presentation to be set up outside or in a hall.

The **AV ANNOUNCER** features a special cab-mounted amplifier PA system working through two all-weather roof-mounted speakers that are used for making announcements or playing audio CDs on the move, or at the location to attract a crowd.

At the location, two cabinet speakers are mounted on the roof or tripod, or indeed a hall, for Video or Public address.

AgriVisual have significantly increased and improved the volume and quality of the audio reproduction with their new 200 watt Amplifier and Mixer, and revised speaker configuration.

The roof mounted horn speakers are now only used for the front mounted PA and all other audio systems utilise the 2 x 100 watt cabinet speakers

The **AV ANNOUNCER** can be fitted to a station wagon, a van or double cab pick up truck fitted with a canopy or tonneau.

## AV ANNOUNCER provides:

- DVD and CD-based programmes to reach rural and urban audiences
- Big screen DVD programmes projected for large audiences
- Flat screen 20" TV for smaller audiences
- Public address system with microphone and CD audio player to play back live and pre-recorded messages and music
- A portable, stabilised generator which provides power at any time, anywhere
- Customised cabinets to protect the equipment in the toughest environments
- The option to mount the equipment in a vehicle of your choice
- Versatility to use the equipment outside and inside a building
- On board Camera and auxiliary equipment

## FRONT COMPARTMENT

- Car radio/CD Player
- 10watt, 12volt Power Amplifier for public address on the move
- Microphone

This equipment enables the driver/announcer to play pre-recorded CDs while the vehicle is on the move or stationary. It allows the announcer to cut into the radio or CD and speak live to the audience. This front compartment equipment is typically used to attract attention and encourage an audience to gather for the major presentation.

The Roof mounted horn speakers are permanently connected to this amplifier.

## REAR COMPARTMENT

- 200watt Power Amplifier and Mixer
- LCD Video Projector
- Spare Video Projector Bulb
- Flat screen TV 20"
- DVD player/recorder
- Camcorder and camera light
- Tripod
- Battery
- Large rear Projection Screen 180cm x 240cm for video presentation
- Folding Projection Screen Frame
- All AV equipment rack-mounted in flight cases
- 2 x Box Speaker x 100 watt
- Speaker Leads
- Speaker Tripod x 2
- Dynamic Microphone
- Microphone Stand
- Microphone Lead
- Phono Cables
- Guy Ropes x 4

- Mallet
- Vacuum Cleaner
- 12v/240volt Lamp

#### Power Supply:

- Quiet running 2Kva inverter Generator, sufficient to run all mounted equipment. This Generator has built-in system that stabilizes the current and protects the equipment being used.
- Earth rod and lead for operator protection
- 25m Power Cable Drum with built in RCD to protect the operator
- Funnel

#### External:

- Roof rack
- All weather 60 watt peak horn speakers x 2
- 10 litre petrol fuel can

**AV ANNOUNCER** has been specifically designed to meet the needs of clients in Africa, based on AgriVisual experience for Ministries of Education, Information, Agriculture, Health and numerous development Agencies and Projects.

*This publication is for international use and whilst AgriVisual Ltd take the utmost care in ensuring that all details are correct, we are constantly striving for improvement and thereby reserve the right to alter model specifications and equipment without notice.*
